

CERTIFICATE COURSE IN MEDICAL INFORMATICS (BATCH – 79) Three Months Distance/ Online Learning

eHCF School of Medical Informatics, promoted by the **eHealth-Care Foundation**, invites you to enroll in its Distance/ Online Learning Program leading to a Certificate in Medical Informatics.

This program is designed for general practitioners and healthcare professionals—or anyone interested in exploring the role of Information & Communication Technology (ICT) in medicine—who may not have the time to pursue a full-time course. In just a few hours over three months, participants gain practical knowledge and earn a recognized certification. The curriculum ensures you stay updated with technological advances that are reshaping everyday medical practice.

Why choose us?

1. Tailored for physicians, surgeons, nurses, and paramedical staff.
2. Faculty and advisors actively engaged in both medical practice and information technology.
3. Course material tested in frontline healthcare settings, ensuring real-world relevance.
4. Easy-to-understand, problem-oriented modules with a strong focus on Telemedicine.

The eHCF School of Medical Informatics is uniquely positioned to deliver the right blend of medical expertise and ICT knowledge—empowering healthcare professionals to integrate technology seamlessly into patient care.

COURSE CURRICULUM

Tutorial (PDF): Our tutorial covers everything from basic to advanced areas of Medical Informatics.

Project assignments: Weekly

Recorded modules: Engaging audio and video presentations keep you updated on digital advancements.

Case Studies: Apply theoretical concepts to real-world medical scenarios.

Final Project submission

Online Test at the end of program

Outcome: Foundational knowledge of medical informatics, hands-on exposure to tools, and ability to apply informatics principles in healthcare settings
